

# Job Opportunity

**Title:** Mechanical / Manufacturing Technician

---

## **Job Summary:**

We need experienced, as well as, entry level Mechanical Technicians who will utilize an assortment of documents to build custom manufactured commercial and industrial refrigeration products in a production environment. We are looking for individuals with high mechanical aptitude, who are comfortable using hand/power tools and willing to learn and take directions.

This is a hands-on position where candidates will receive training, guidance and direction from qualified personnel to perform the following essential duties and responsibilities:

- Brazing copper tubing per company/customer standards
- Assist with mechanical piping layout per design documentation on assigned projects
- MIG welding
- Perform mechanical inspections to ensure systems are built per design specifications
- Interact professionally with all departments, vendors and customers
- Maintain a positive work environment by consistently achieving goals and reinforcing the team approach
